

# OxyPure™ Smart Air Purifier

The most Advanced Air Purifier on the Market today,  
Keeps large areas up to 48 Square Metres clean!

## ADVANCED 4-FILTER SYSTEM

### Stainless-Steel Pre-Filter (20 Year Lifespan)

**Captures & Traps** large particles, pollutants, and allergens, including pet Hair, dander, and pollen

### Bio-Guard Filter (20 Year Lifespan)

8,000-volt electrostatic filter **kills 99.99%** of airborne mold, bacteria, and **destroys 99.68%** viruses and eliminates particles as small as 0.09 microns.

### Ozone Emission Removal Filter (20 Year Lifespan)

**Eliminates** harmful ozone emissions less than 0.001 PPM (parts per million), converting it into oxygen.

### HEPA/Activated Carbon Filter (Up to 1 Year Lifespan)

**Captures & Traps** Pollen, Allergens, Industrial Emissions, VOCs including Formaldehyde, Benzene and more.

*"We can't control what's in the Air,  
but we can control what we  
breathe in"*

This air cleaner complies with the federal ozone emissions limit.  
ARB CERTIFIED

# FEATURES

## 360 DEGREE AIR-INTAKE

Allows the OxyPure™ to be positioned anywhere in a room, as opposed to many units that must be placed against a wall to be effective because they only take in air from one side.

## 6 FAN SPEEDS

The OxyPure™'s powerful, whisper-quiet DC Motor offers a full range of fan speeds from a gentle breeze to turbo, that lets you clean the air at your pace, and comfort level.

## SIX ODOR LEVELS

The OxyPure™'s advanced odor detection system alerts you in real time to odor issues in the air, allowing you to eradicate them quickly and easily.

## SLEEP MODE

Automatically turns off all indicator lights and allows for flexible fan speeds and noise levels to promote ideal sleeping conditions.

## ULTIMATE CLEAN

The OxyPure™ reacts based on air quality, automatically adjusting the fan to a higher speed when its advance sensors detect a sudden drop in the quality of the air.

## WHEELS

Facilitates easy to transfer between rooms.

## 6 AIR QUALITY LEVELS

With the OxyPure™'s color-coded display, you will know at a glance how clean, or dirty, your air is, and be able to take action immediately.

## ECO-FRIENDLY MODE

The OxyPure™ stays off until it detects poor air quality. Once it does, it automatically goes to the highest fan level until the air improves, and then it shuts off. This function, unique to the OxyPure™, is a huge energy-saver.

## WI-FI-ENABLED

You can track, monitor, and operate the OxyPure™ from virtually anywhere using the NuWave Connect app and your smartphone.

## 3 CERTIFICATIONS

The OxyPure™ is certified by the Association of Home Appliances Manufacturers (AHAM), the California Air Review Board (Carb), and the EPA's Energy Star.
